- A) bigger than the Earth
- B) smaller than the Earth
- C) closer to the sun
- D) farther to the sun

10 - 12. soruların doğru cevabını verilen metne göre işaretleyiniz.

Neil Alden Armstrong was born on the fifth of August, 1930. He was an American astronaut and the first man to walk on the moon. He walked alone on the moon for twenty minutes and then his friend Aldrin joined him and became the second human to set foot on the moon. While they were investigating the moon, they saw how easily a person could move on lunar surface. Armstrong continued his famous walk named as East Crater for fifty nine meters. They spent two and a half hours on moon surface. It was the shortest of all lunar landing missions. They travelled around the world and shared their amazing experience with people for years.

10. Neil Alden Armstrong - - - -.

- A) became the first person to walk on the moon
- B) walked alone on the moon for two hours
- C) travelled around the world alone
- D) could run on the lunar surface

11. What did Armstrong do for twenty minutes on the moon?

- A) Aldrin joined him.
- B) They spent a few hours.
- C) He went for a walk alone.
- D) It was the shortest mission.

12. Which one is false?

- A) Their mission took two and a half hours on the moon.
- B) They saw how easily a man could walk on the Earth.
- C) They travelled around world and shared their experience.
- D) Neil Armstrong was the only person to set foot on the moon.
